

CSCI-P 538 Fall 2016 Assignment: Research Paper Summary

A Deadline

December 11 2016 23:59:59 EST. This is a hard deadline and no extension will be given. Any clarification queries should be sent to `p538fall16-l@list.indiana.edu`.

B Problem Description

Pick one (and only one) of the papers in the attachment (1 – 4) and write a paper summary of **at least 500 words** in English. The summary should include at least the following information:

- What is the problem the paper tries to solve?
- What is the high-level approach used?
- What are the key results?
- How does this work advance the state-of-the-art?
- What are the limitations of the work?
- What is the potential future work enabled by this paper?

Submit a single document to Canvas before the deadline. Acceptable formats are PDF, Microsoft Word, and text. Only electronic submission is allowed. Name your submission as `summaryX.pdf` (`.doc/.docx/.txt`) where `X` is the paper ID (1 to 4).

It is important to note that **all sentences in your summary must be your own**. **Directly copying/pasting text from the paper is not allowed, and will result in losing 50% to 100% of your overall grade**. Your summary will be graded by the professor who is very familiar with these papers. The assessment will be based on three aspects: how well work is summarized, whether your summary offers new insights, and the writing quality.

C Honor Code

Students must follow the IU honor code (<http://www.iu.edu/~code/code/responsibilities/academic/index.shtml>). This homework is an individual assignment, and no collaboration among students is allowed. **In no case may your solution be copied from another student or a third-party source**. Any violations of the honor code will be dealt with strictly, including but not limited to receiving no credit for the entire homework.
